QVI Chips Category Analysis

Customer Segmentation & Analysis

Buhlebethu Biyela

31/03/2026

Objective

Content:

Analyse customer purchasing behaviour in the chips category

Identify key customer segments

Understand drivers of sales

Provide data-driven recommendations

Data Overview

Content:

Transaction dataset (sales, quantity, products)

Customer dataset (lifestage, premium segment)

Data cleaned and merged for analysis

Data Preparation

Content:

Converted date format

Removed non-chip products (e.g. salsa)

Removed outlier customer (bulk purchasing)

Created new variables:

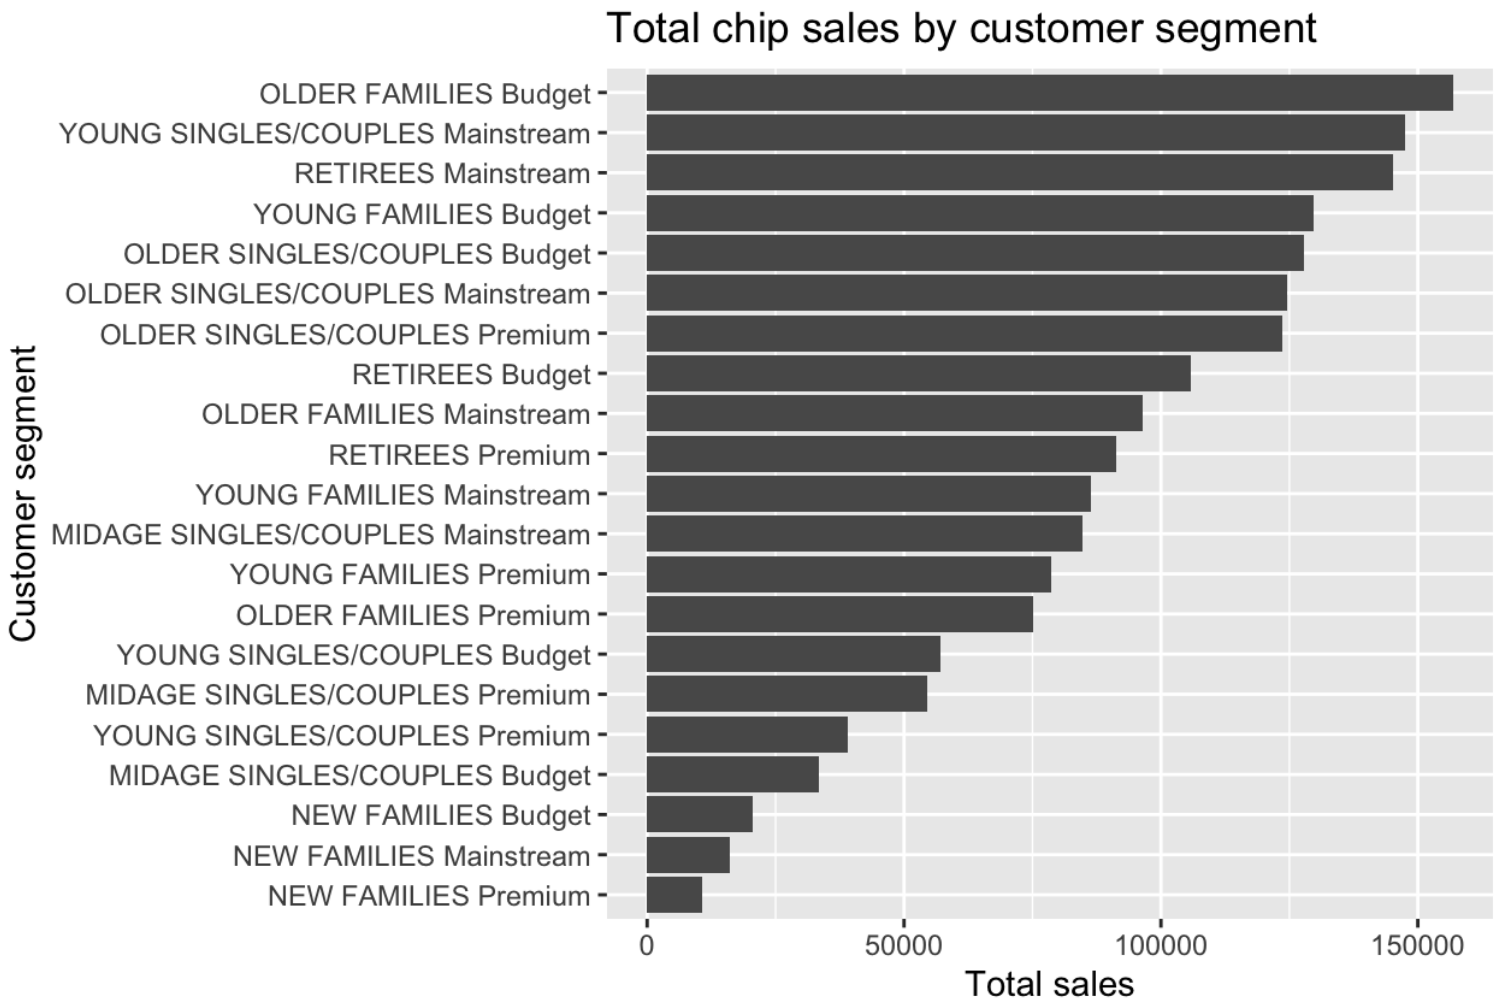
Pack size

Price per unit

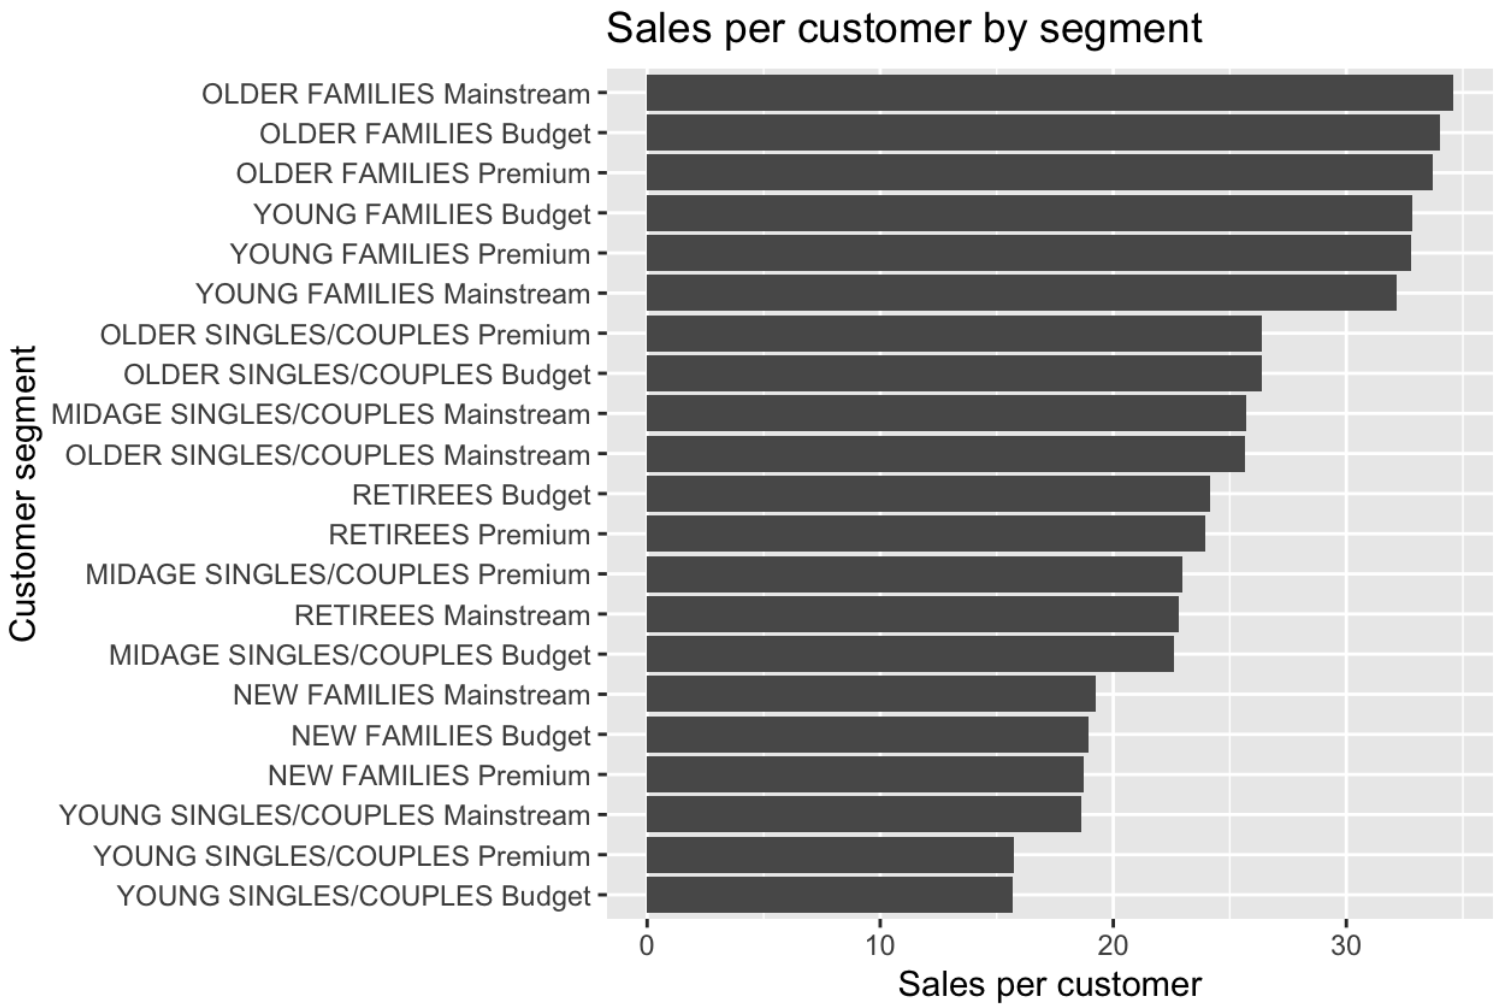
Key Metrics

- Content:
- Total Sales
- Total Quantity
- Average Price per Unit
- Packs per Transaction
- These metrics were used to compare customer segments.

Total Sales by Segment

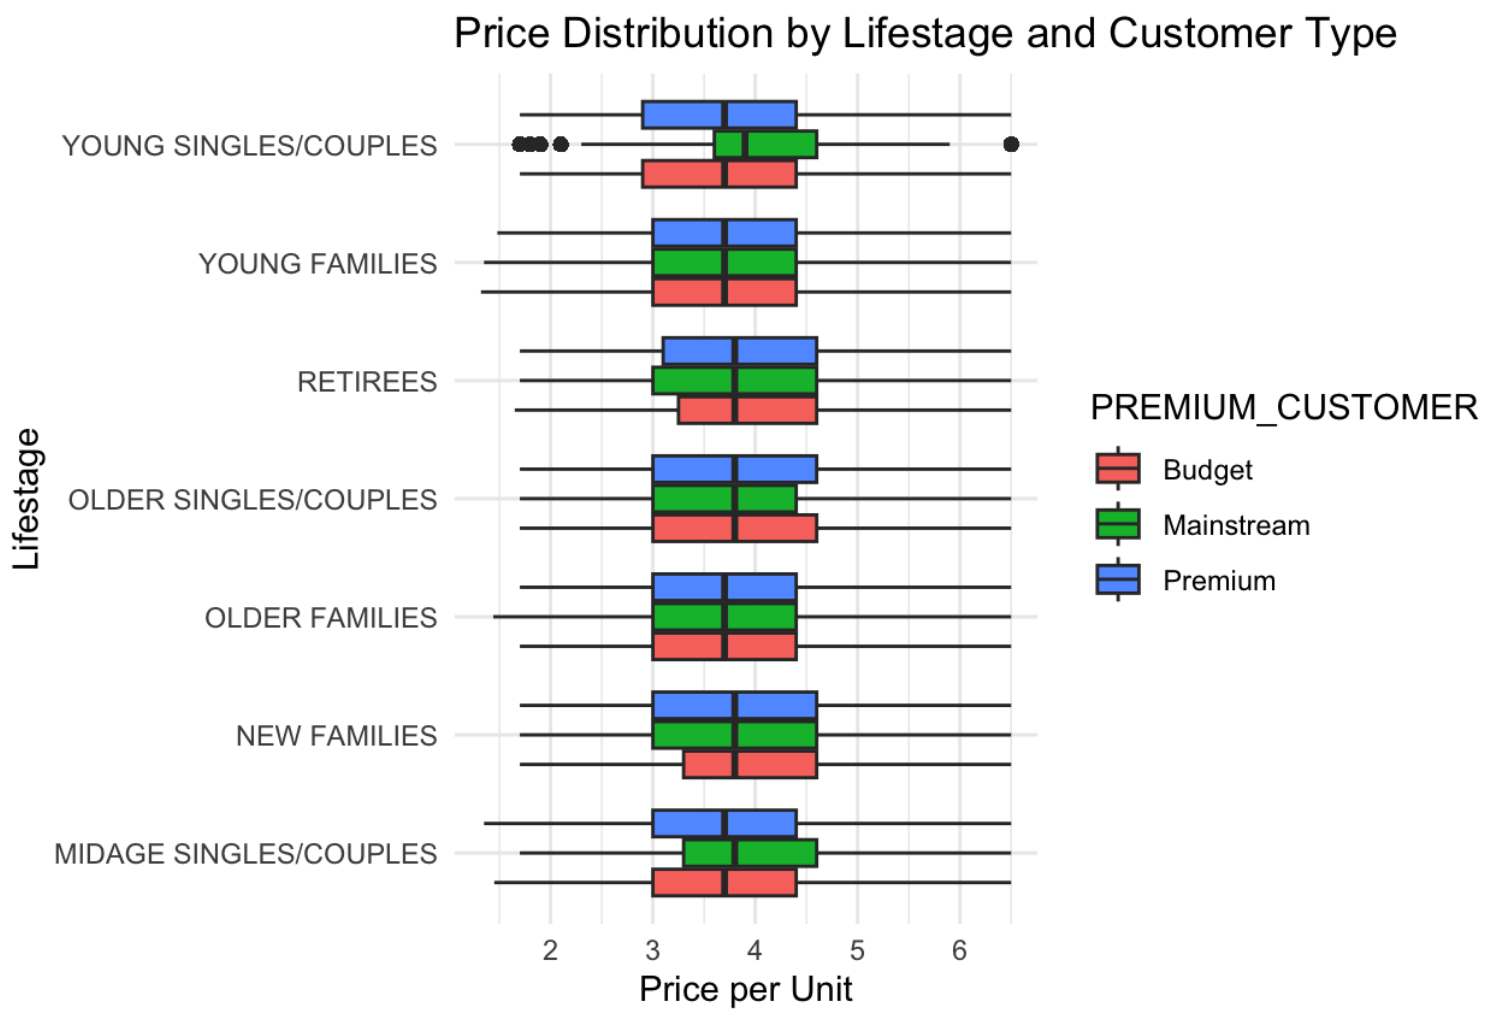


Average Price per Unit

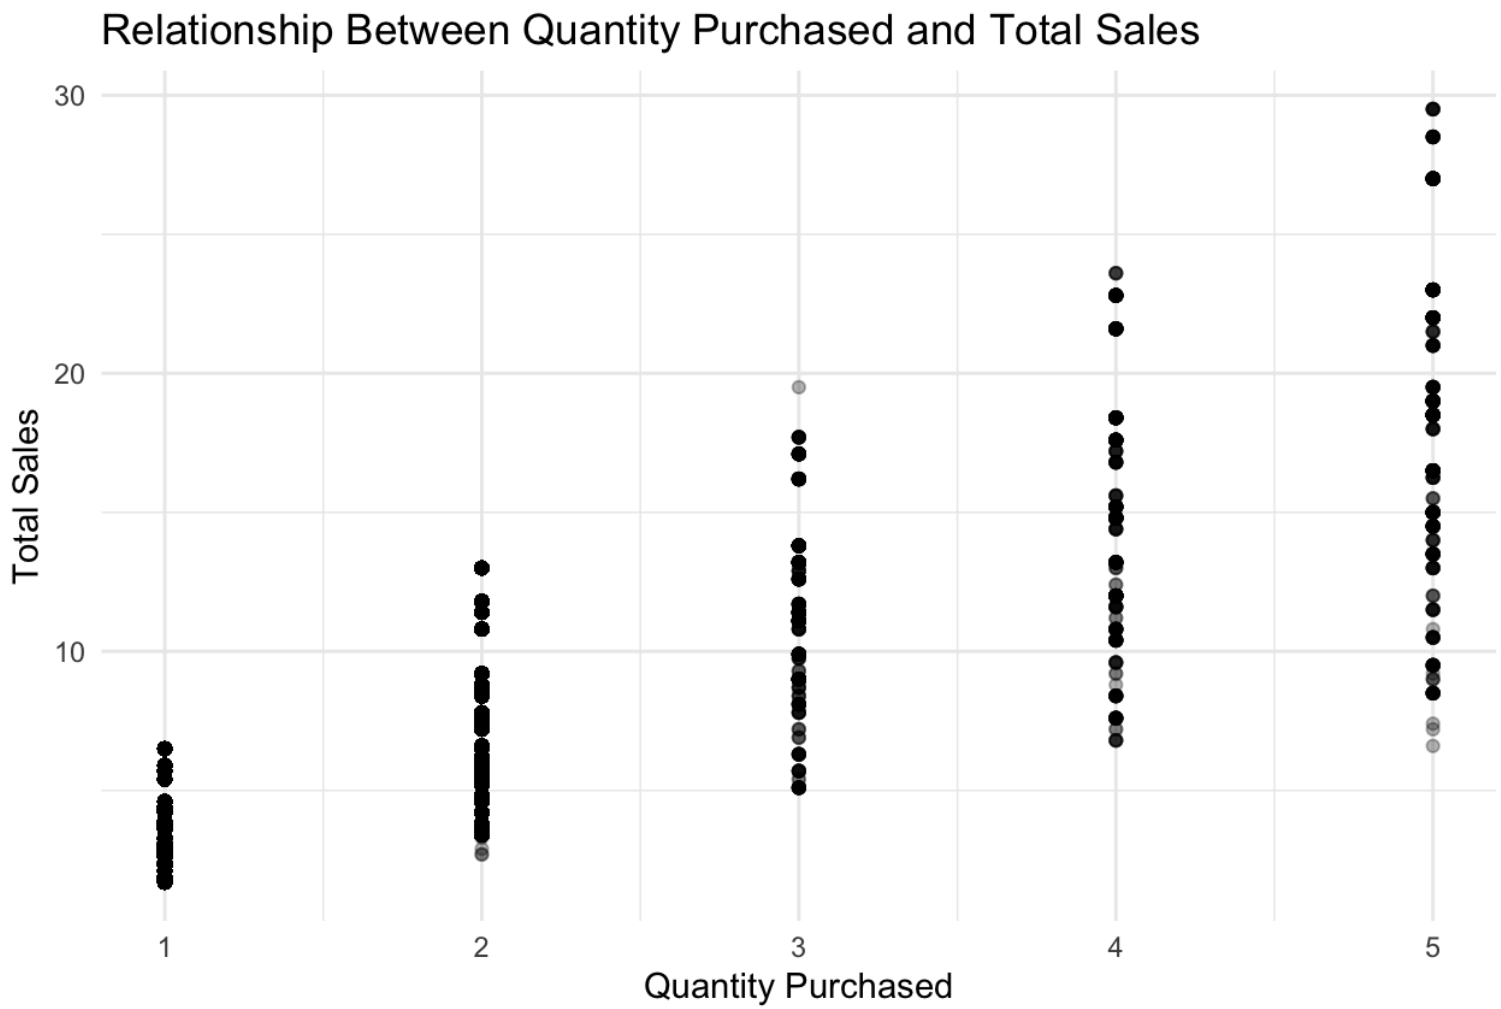


Total Quantity

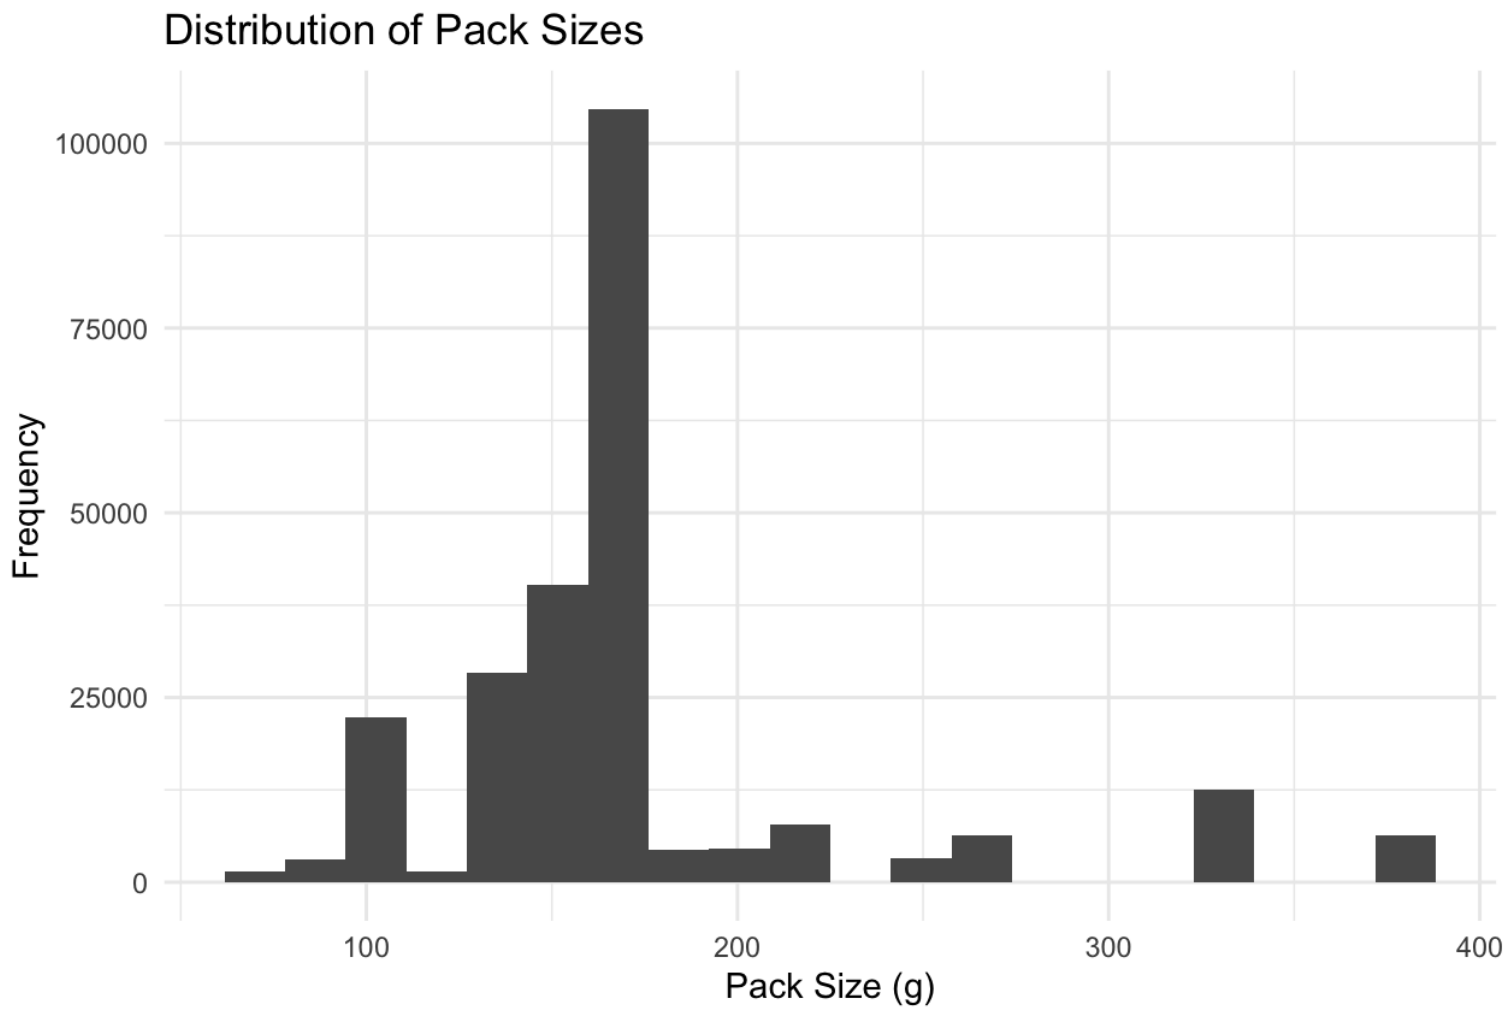
Price Distribution



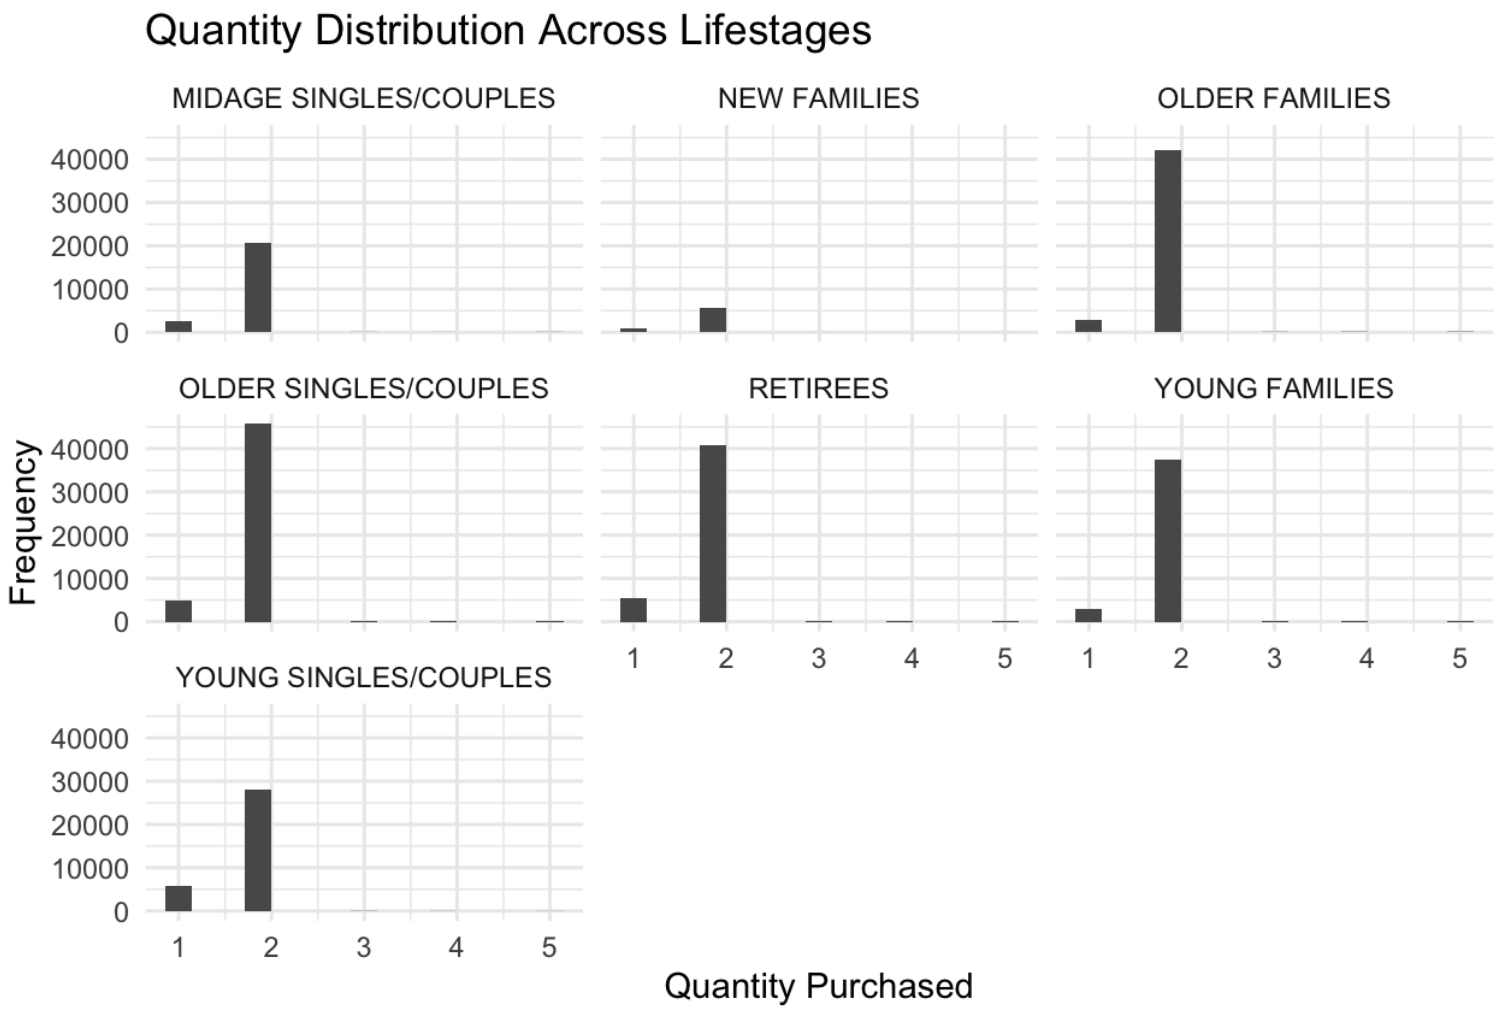
Quantity vs Sales



Pack Size Analysis



Quantity Distribution



Key Findings

Content

Young Singles/Couples – Mainstream:

- Highest price per unit
- Premium-oriented behaviour

Family segments:

- Highest total sales
- Highest quantities

Sales driven by:

- Volume (families)
- Price (younger mainstream)

Recommendations

- **Premium Strategy**
- Target younger mainstream customers
- Focus on premium products and branding
- **Value Strategy**
- Target families
- Offer larger packs and promotions
- **Category Strategy**
- Use segmented approach
- Avoid one-size-fits-all strategy

Conclusion

- **Content:**
- Customer segments behave differently
- Clear split between:
  - Premium buyers
  - Value/volume buyers

- Aligning strategy with these behaviours will increase profitability.
